

## **Little Egg Harbor M.U.A. 2026 Water Quality Report**

**To comply with the Safe Drinking Water Act amendments, Little Egg Harbor Municipal Utilities Authority will be annually issuing a report on monitoring performed on its drinking water. The purpose of this report is to advance consumers' awareness of the need to protect the precious water resources. Once you have read the report, you will see that the water provided by the Little Egg Harbor Municipal Utilities Authority during 2025 was good, or better than state and federal standards for drinking water.**

**That's a fact we are exceptionally proud of. A copy of the 2026 (results from 2025) Annual Drinking Water Quality Report is now available at:**

**Little Egg Harbor Municipal Utilities Authority 823 Radio Road, Little Egg Harbor, NJ Monday through Friday 8:00am-4:00pm.**
